SUMMARY

Senior Frontend Developer with 6.5+ years of experience specializing in Angular (v2–v19), building scalable, high-performance, and maintainable enterprise applications. Expert in modular architecture, state management, RxJS, UI optimization, and secure REST API integrations. Proven success leading UI development, mentoring teams, and delivering business-focused solutions that improve user experience, performance, and operational efficiency.

CORE SKILLS

- **Technical Skills:** Angular (v2–v19), Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Ionic Framework, ReactJs, RxJs, NgRx, Unit Testing (Jasmine, Karma)
- **UI Libraries:** Angular Material, PrimeNG, Bootstrap
- **Architecture & Patterns:** Modular Architecture, Lazy Loading, Component Reusability, RxJS Streams
- **Tools & DevOps:** Git, GitLab, Bitbucket, Docker, Postman, Swagger, UI performance tools (Lighthouse)
- **Development Practices:** Agile (Scrum), Code Reviews, Role-Based Access Control

WORK EXPERIENCE

DNS Infrastructure Services - Netnautix Technologies

Senior Frontend Developer | Feb 2025 – Present
(Angular v19, PrimeNg, Typescript, RxJs)

- Developed a full-scale Angular application with modular architecture, improving code maintainability and scalability by 40%.
- Optimized Angular components, change detection, and lazy loading, resulting in 35% faster load times and improved overall performance.
- Refactored complex UI workflows into reusable components and services, reducing duplicated code by 50%.
- Integrated comprehensive admin, technician, and user management systems with role-based access control to support operational efficiency and secure functionality.
- Built and deployed the applications using optimized production builds, ensuring stable and high-performance releases.

Sailboat Booking System - Netnautix Technologies

Senior Frontend Developer | Nov 2023 – Mar 2025
(Angular v16, Angular Material, Typescript, CSS, RxJs)

- Developed a complete Sailboat Booking System using Angular, enabling users to search, compare, and book sailboats through an intuitive and responsive UI.
- Built secure authentication, role-based access, and form validations to streamline booking submissions and reduce user errors by 30%.
- Created admin dashboards for fleet/pricing management, improving operational efficiency by 35%.
- Integrated and customized FullCalendar to manage and visualize booking slots, availability windows, and maintenance schedules, reducing booking conflicts by 40% and enhancing the overall experience.
- Built and deployed the applications using optimized production builds, ensuring stable and high-performance releases.

Parking Lot System - Netnautix Technologies

Senior Frontend Developer | Dec 2022 - Jul 2023
(Angular v14, Ionic Framework, Typescript, RxJs, ReactJs)

- Developed a dynamic Parking Lot System using Angular and also developed the mobile app using Ionic Framework to manage vehicle entries, exits, slot availability, pricing rules, and real-time occupancy updates.
- Built interactive dashboards displaying live parking status, occupancy charts, and revenue metrics for admins and supervisors.
- Integrated Stripe payment gateway to enable secure online and on-site payments, automating transaction processing and improving payment completion rates by 35%.

Time Tracking System - Netnautix Technologies

Senior Frontend Developer | Aug 2021 - Oct 2022
(Angular v11, PrimeNg, Typescript, RxJs)

- Developed a Time Tracking System using Angular to log, monitor, and manage employee work hours with real-time updates.
- Implemented project-wise task tracking with start/stop timers, automatic timesheet generation, and reporting dashboards.
- Built role-based dashboards for employees, managers, and admins, improving transparency and accountability by 40%.
- Integrated approval workflows for timesheets, leave requests, and overtime, reducing administrative bottlenecks by 30%.
- Optimized performance of data-intensive timesheet reports using Angular's lazy loading.
- Ensured secure login and role-based access control to protect sensitive employee data.

Website Creator - Netnautix Technologies

Frontend Developer | Dec 2020 - Jun 2021
(VueJs, Typescript, Javascript, HTML, CSS)

- Implemented new features in Vue.js applications, enhancing functionality and improving overall user experience.
- Resolved front-end issues and bugs across multiple Vue.js modules, increasing application stability and reducing error rates.
- Optimized Vue components, lifecycle hooks, and data handling to improve rendering performance and responsiveness.

GoDaddy & Web.com Client Website Development - Affinity Express, Inc.

Frontend Developer | Mar 2019 - Aug 2020
(WordPress, Javascript, HTML, CSS, Responsive, Bootstrap)

- Created and customized websites for GoDaddy and Web.com clients using HTML, CSS, JavaScript, and WordPress.
- Developed fully responsive web pages optimized for mobile, tablet, and desktop, improving user engagement and accessibility.
- Ensured cross-browser compatibility and resolved UI/UX issues across Chrome, Firefox, and Safari.

EDUCATION

Bachelor of Engineering — Electronics & Telecommunications

PES Modern College of Engineering, Pune | 2012 – 2018
